

**With You** (Temika Moore/ ©2002 Pink Panna Music Publishing/ASCAP)

Verse:           You are my tried and true friend  
                    One who loves me  
                    Always in my corner  
                    Here to catch me when I lean  
                    For so long together, you know me better  
                    We've had good times and bad, happy and sad,

Chorus:           With you I'll go all the way  
                    With you I'll go all the way

Verse:           As you stand here with me  
                    I see your love so clearly  
                    Time's allowed us to mature  
                    To be free, yet still secure  
                    Heaven knows our trials, journeys for miles  
                    Whether they've been good times or bad, happy or sad,

Chorus:           With you I'll go all the way  
                    With you I'll go all the way

Verse:           For the moments that we have  
                    And the one's that will come  
                    Life has shown us we are sure  
                    To go through trials as humans  
                    And for this I know, even though  
                    In good times and bad, happy and sad,

Chorus:           With you I'll go all the way  
                    With you I'll go all the way

Bridge:           With you, I'll go all the way  
                    With God in our life we won't stray  
                    Nobody knows what the road  
                    May bring us, but we must promise to hold on today  
                    For with you I'll go all the way

Chorus:           With you I'll go all the way  
                    With you I'll go all the way  
                    In good times or bad, happy or sad  
                    With you I'll go all the way
